PROFILE

Results-oriented software developer with a degree in Computer Science and professional experience in both regular employment and freelance projects. Skilled in full-stack development. Adept at effective communication, problem-solving, and collaborative teamwork. Known for exceptional adaptability to new challenges and a passion for delivering top-tier solutions. A natural leader with a talent for motivating teams and fostering a positive work environment.

EDUCATION

2019 – August 2023
Addis ababa, Ethiopia

Computer Science, Microlink Information and Technology College

SKILLS

- python
- React
- mongo db

- Javascript
- svelte js
- My sql

- C# (.Net)
- Node Js
- Git

PROFESSIONAL EXPERIENCE

February 2024 – present
Addis Ababa, Ethiopia

Fineto Software, Junior Software Developer
- Develop and maintain applications using Frappe ERP framework
- Implement AI automation solutions to enhance business processes
- Develop .NET applications

February 2024 – present

Upwork, Software Developer
- Specialize in frontend development using Svelte and SvelteKit
- Develop efficient and responsive web applications for diverse clients
- Implement backend solutions using Go lang to create full-stack applications
- Manage multiple projects simultaneously, ensuring timely delivery and client satisfaction

AWARDS

2023 Best Project winner, Microlink inforamtion technology college
- We as a team have done an outstanding project entitled TELE-HEALTH TECHNOLOGY which was selected as the first among all projects done in computer science department at Microlink information technology college

PROJECTS

Ethio Tour

As a full-stack developer using Svelte.js, Node.js, MongoDB, and Express, I created EthioTour, a comprehensive tourism management system for customized travel experiences in Ethiopia. It featured a user-friendly interface, secure booking and payment, interactive maps, reviews, multilingual support, and responsive customer support. I overcame integration challenges by efficiently handling data rendering and implementing dynamic filtering. EthioTour leverages the power of Svelte.js for dynamic UI, Node.js for backend scalability, MongoDB for data storage, and Express for API integrations, enhancing Ethiopia's tourism industry.

Tele-Health Technology

As a full-stack developer using Svelte.js, Node.js, MongoDB, and Express, I worked with a team to build *Tele-Health Technology*, an innovative platform aimed at revolutionizing healthcare access. The app facilitated seamless virtual consultations between patients and healthcare providers, offering features such as real-time video conferencing, secure health data storage, appointment scheduling, and digital prescription management. The platform ensured HIPAA-compliant data security, user-friendly interfaces, and accessibility for remote areas. This project earned the *2023 Best Project Award* from Microlink Information Technology College, recognized as the top project in the Computer Science department.

Customer Relation Management (CRM) website

I had the opportunity to work on a real-life project using svlete.js, node.js, MongoDB, and Express for an Ethiopian company called "Teff Flour Company". The project was a customer relationship management (CRM) application. The project included several features that showcased my skills as a developer, including user authentication, a dashboard for viewing sales and lead data, customer and lead management tools, task management and communication features, and reporting capabilities.
One of the main challenges of the project was ensuring the security and privacy of customer data, which I addressed by implementing secure user authentication and authorization protocols.
Overall, this project was a valuable experience that allowed me to demonstrate my technical abilities as a developer and my ability to create practical solutions for real-world business challenges.

Gebeyet ecommerce site

I worked on Gebeyet's e-commerce site development, and it is an advanced e-commerce platform for Ethiopian customers. It offered a wide range of products, personalized recommendations, secure payments, efficient order tracking, and reliable delivery services. Gebyet aimed to revolutionize online shopping in Ethiopia by providing a user-friendly interface and ensuring a secure and satisfying shopping experience.
